

Anindita Amantaruna Putri Roswanto

Depok, Indonesia | [\(+62\) 896-6978-8508](tel:+6289669788508) | aninditaamantaruna@gmail.com | [GitHub](#) | [Website](#)

Student majoring in Software Engineering at Taruna Bhakti Vocational School Depok, with experience in frontend development, backend development, and UI/UX design through academic and personal projects. Passionate about building user-friendly applications and continuously learning new technologies.

EXPERIENCE

Software Developer (Personal) | 2024 – Present

Developed and published responsive web and mobile applications through personal projects using modern technologies, focusing on frontend development, UI/UX design, backend development, API integration, database management, and continuous feature improvements.

UI/UX Designer (Team) | 2024

Worked as a UI/UX Designer in a team project to design a mobile cinema ticket booking application. Responsible for creating user flows, wireframes, high-fidelity mockups, and interactive prototypes using Figma while collaborating with team members to deliver a userfriendly and visually consistent mobile application. And I also use Adobe Ilustaror

School Organization | 2024 – 2025

Treasurer, Student Council (OSIS)

- Managed financial records, prepared activity budgets, and supported school events and programs

PORTFOLIO PROJECT

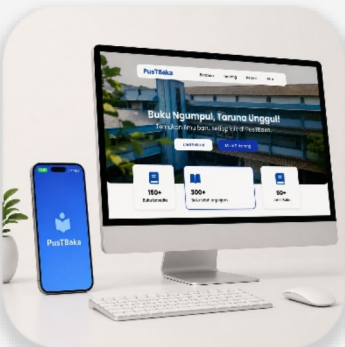

ANINDITA AMANTARUNA PUTRI ROSWANTO

LaporGas

LaporGas is a web-based public complaint system built with Next.js, Express.js, and Expo. It allows users to report issues, track complaint status, and interact with an AI assistant on both desktop and mobile devices.

[See Project →](#)

PusTBaka

PusTBaka is a library management system built with Next.js, MySQL, and Expo. It allows users to search, borrow, and return books, while helping administrators manage book collections and borrowing records.

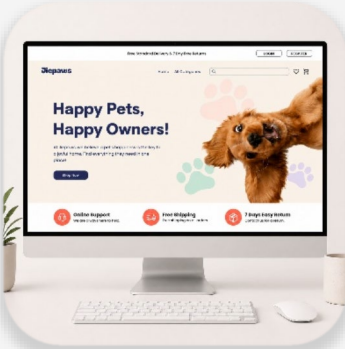

[See Project →](#)

Pemilihan Ketua OSIS 2026/2027

Student Council Election is an online voting system built with Next.js, Tailwind CSS, and Supabase. It allows students to vote for OSIS chairman candidates through a secure and user-friendly platform.

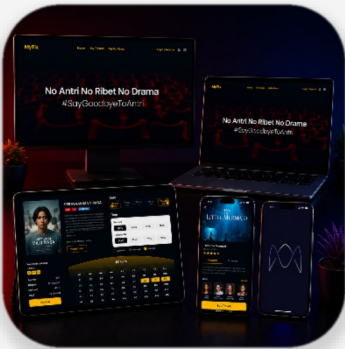

[See Project →](#)

Jiepaws

Jiepaws is a pet shop website built with React, Vite, and a free public API. It allows users to browse products, search by category, save favorites, manage their cart, and place orders through a user-friendly interface.

[See Project →](#)

MyTix

MyTix is a UI/UX design for a movie ticket booking application, created in Figma for both web and mobile platforms. It allows users to select seats, book movie tickets, and request ticket refunds through a modern and user-friendly interface.
